Special Notes:

- ◆ millimeter (mm) is the basic unit of all the measures listed in this catalogue;
- ◆ Rated voltage for underwater lamp is 12V, and that of other series lamps is AC220V/50HZ unless noted otherwise;
- ◆ When necessary, we will improve the product structure for the sake of updating product qualities and functions;
- ◆ Generally speaking, lamp appliances are not included in the standard products listed in this catalogue(with LED products as an exception);
- ◆ All the colors here are for reference only because photographing and printing may make it a little different from the original;
- ◆ Any configuration or design can be get customized with samples or pictures.

Our products are coated with outdoor powder in an electrostatic method to make sure they turn aesthetic in appearance and won't fade or depaint because of the strong adhesion of the powder. Furthermore, the colors are optional.

Color sample:

Note: The colors here are for reference only and permissible errors do exist;

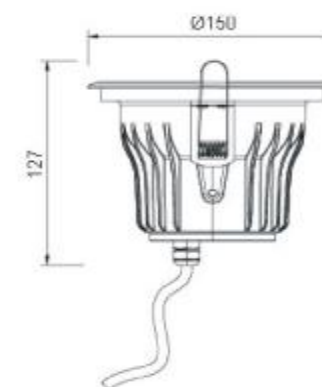

Features of Our LED lamps:

1. Suitable in the following operating conditions: temperature is between -20°C and 80°C degrees, and the working voltage and current are 13.5V and 240mA; Luminous flux is 220Lm, illuminate angle is 170° .
2. Long life (It takes 30 thousand hours for the luminous flux to attenuate to 70% of its standard life.)
3. Energy-saving (It can save 87.5-90% energy than an ordinary incandescent lamp in the same brightness)
4. High luminous efficiency (Spectrum almost entirely focused on visible light frequency, which makes it possible for the efficiency to reach up to 80-90% whereas, that of an ordinary incandescent lamp is only about 10-20% .)
5. Reliable and durable (The unexpected scrap rate and maintenance cost is low because it's free of fragile components like tungsten filament or any glass shells.)
6. With flexible application and compact structure.
7. With high light quality (Because in this spectrum there is no ultraviolet and infrared ray, no heat, no radiation make it truly green light source)
8. Environment-friendly (Different from fluorescent lamps, no mercury will be found in this product, which makes it pollution- absent.)
9. With short response time (Suitable for any place where calls for high switch frequency.)
10. With various light color to choose from, red, yellow, blue, green, white and warm white included.

LED Series

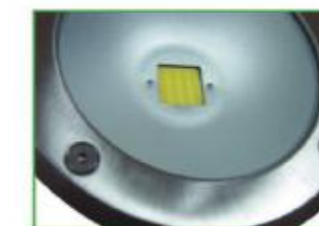

3003

◆ By enlarging the cooling area and passing the heat directly to the lamp, the steel tubular design of the lamp body ensures the normal lighting and effectively reduces the temperature of light body.

◆ New LED illuminant, composed with dense star pointed light, has long service life and gentle and even lights. They meet their favor for its energy conservation and environmental protection. The figure shows the working state of the green LED lamp.

- ◆ Both the front cover and the hex socket cap screws are made of stainless steel. No rusting in the normal outdoor conditions because of the corrosion resistant and smooth surface.
- ◆ Oxidized and plated aluminum reflectors with good light reflection and high anti-ageing, kinds to choose from including smoothes and sanded smoothes.

Item No.	Rated voltage	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
3003	95-240V/50Hz	LED	3W	48.5x33x27	12	13/14Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67;
Note: outdoor ceiling lamp.

Specifications

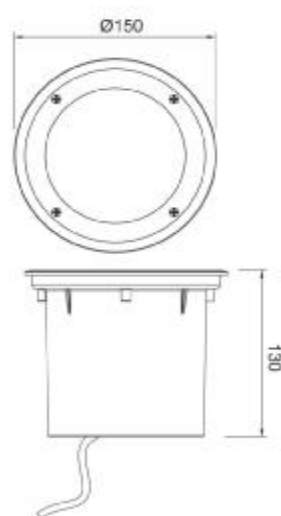

Integration of lamp and electrical appliance makes these luminaries highly structured. Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Wall Lamp Series

4829

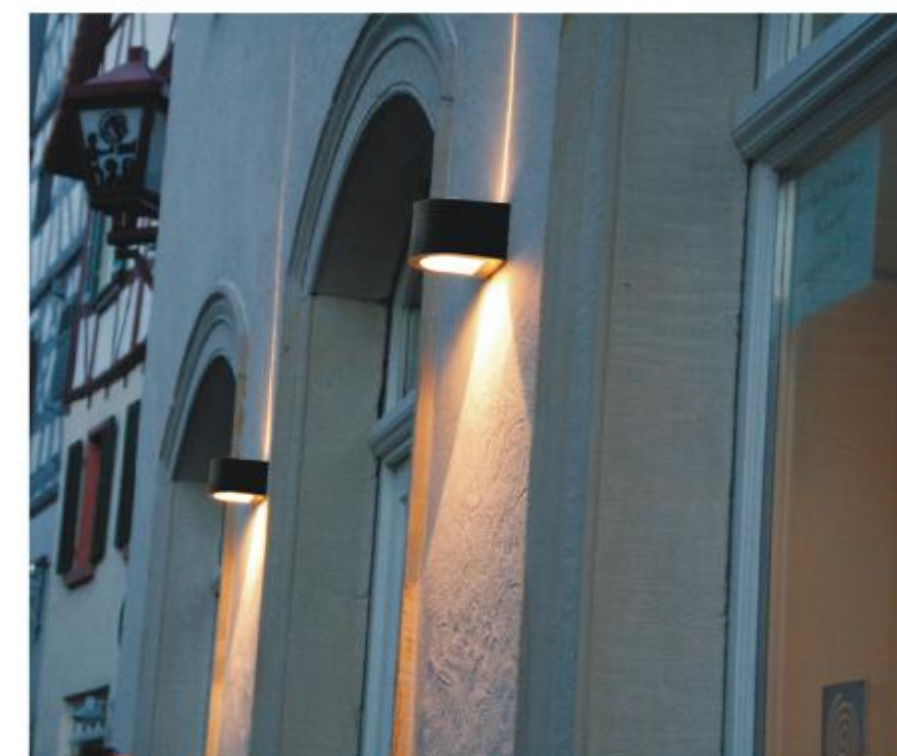

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
4829	E27	JDD 	100W	41x37x46	8	16/17Kg

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Transparent light-gathering and flat tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP54;
Powder coating finish.

Specifications

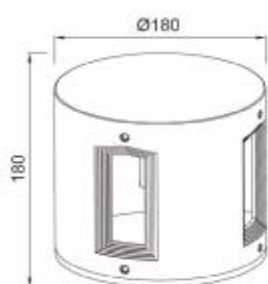

Sprayed with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features. It provides even light distribution and eliminates glare to an acceptable level for its tubular design, which is also good for heat dissipation and pleasing to the eyes. It is suitable for villas, parks, squares and the garages and residential areas.

Wall Lamp Series

7271

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW

7273	G12		70W/150W	50x34x22	6	17/19Kg
	E27	JDD	100W			

Material and features

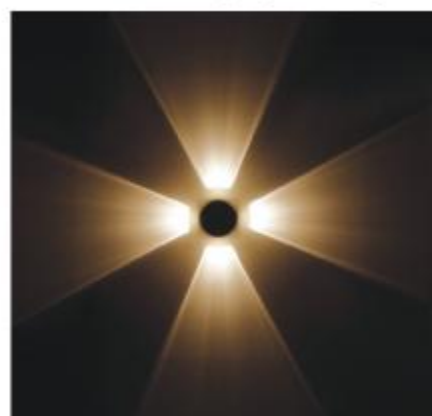

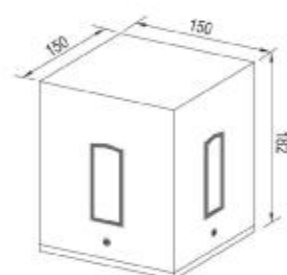

Body made of die-casting aluminum with smooth and seamless face;
High temperature resistant, transparent glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP54;
Powder coating finish.

Specifications

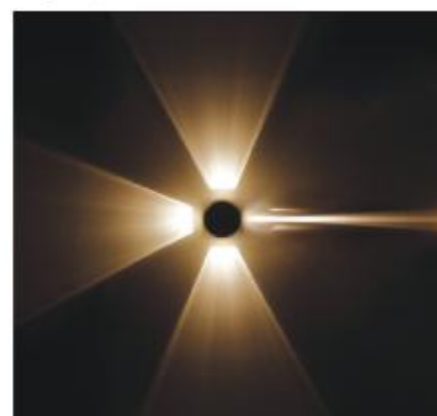

Sprayed with outdoor powder in electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features. It has both good illumination and adornment effect, meeting great favor among our customers for its simple design and easy installation. It is suitable for villas, parks, squares and the garages and residential areas. Different illumination effects can be got by choosing among the four different light penetratings according to your tastes.

5663		Par38	80W			3/3.7Kg

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Vandal resistance;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP54;
Note: With the reflector right above the lamp, reflection angles adjustable, 5663 series meet great favor.

Specifications

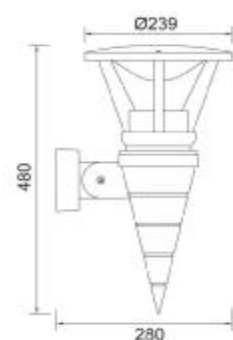

This unit provides even light distribution and eliminates glare to an acceptable level to create visual continuity. They meet great favor among our customers for its exquisite design, unique profile, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc.

7193-5W	E27		Max.26W	65x42x39	10	17/18.5Kg

Material and features

Body made of aluminum alloy with smooth and seamless face;
 Transparent tempered glass diffuser for 6111W; High boron, frosted glass diffuser for 7193-5W;
 Fitting screws in 304 stainless steel;
 Waterproof and durable silicone rubber gasket;
 Powder coating finish in electrostatic method;
 Protection class: IP54;
 Note: 6111W consists of two colors with matt silver on the top half and wood texture on the lower half. It has high reflectivity with the reflector right above the lamp.

Specifications

This unit provides even light distribution and eliminates glare to an acceptable level to create visual continuity. They meet great favor among our customers for its exquisite design, unique profile, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc.

Material and features

Body molded from aluminum tube;
Mounting bracket made of die-casting aluminum;
Transparent PC and tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish;
Protection class: IP54.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these wall luminaries provide even light distribution and eliminates glare to an acceptable level which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

4481M	G24d		26W	55x36.5x55	12	23/25Kg
	E27		Max.26W			
	RX7S		70W			

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Frosted tempered glass diffuser;
Engineering plastic embedded box with anti-corrosion;
Fitting screws in 304 stainless steel;
High temperature resistant and durable silicone rubber gasket;
Protection class: IP54;
Note: Plastic embedded box available on consultation.

Specifications

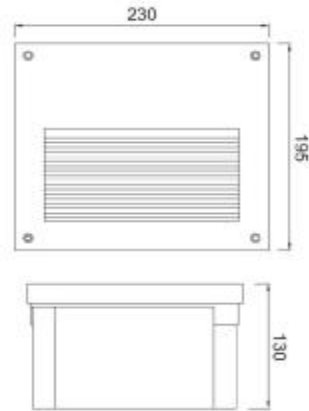

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these wall luminaries provide even light distribution and eliminates glare to an acceptable level which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc. They meet great favor among our customers for its easy installation and good adornment effect.

Recessed Lamp Series

4485+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
4485+B	G24d		26W	50x43x32	8	23.3/25Kg

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Frosted, tempered glass diffuser;
Anodized aluminum reflectors;
Engineering plastic embedded box with anti-corrosion;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP54;
Powder coating finish.

Specifications

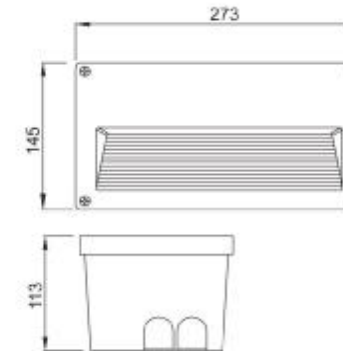

Integration of lamp and electrical appliance makes these luminaries highly structured, giving more stable performance and bringing both good illumination and adornment effect, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc.

Lawn Lamp Series

Schematic Diagram of Lawn Lamp

Precautions:

- ◆ To follow the steps: check the components installing wire connection safety check electricity commissioning;
- ◆ Handle the lamps with care and make sure they are palletized neatly and steadily avoiding damp and abrasion;
- ◆ The frame needs to be fixed and substantial enough; foundation bolts are screwed tightly to prevent vibration; the wires exposed or cables should be protected with flexible metal tube;
- ◆ The metal frame, the accessible bare conductor of the lamp and PE or PEN of the metal hoses should be all reliable and have clear labels;
- ◆ Before electricity commissioning, make sure the lamps and lighting panels are in place and branch insulation resistance testing is successful; continue to check and inspect even after the current is switched on; if there exists some problems, do remember to turn off the power before searching into the details;
- ◆ Please review the attached instructions and diagram when installing any products of this series.

Lawn Lamp Series

7193

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7193	E27		Max.26W	53x36x66	6	12/13.5Kg
7193D						13/14.5Kg

Material and features

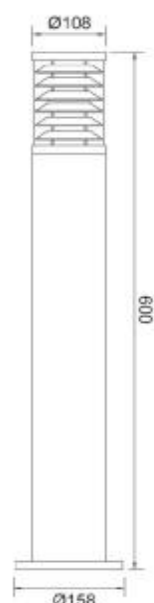

Body molded from aluminum alloy;
High boron, diffuser for 7193, clear glass for 7193D;
Fitting screws in 304 stainless steel;
Anodized raffinal reflectors for 7193D;
Waterproof and durable silicone rubber gasket;
Powder coating finish;
Protection class: IP44.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution and eliminates glare to an acceptable level which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
5664	E27		Max.26W	23x23x80	1	3.2/4Kg
	E27	Par38 	80W			

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP54;
Note: With the reflector right above the lamp, reflection angles adjustable, meet great favor.

Specifications

This unit provides even light distribution and eliminates glare to an acceptable level to create visual continuity. They meet great favor among our customers for its exquisite design, unique profile, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc.

Lawn Lamp Series

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6112	G5.3	MR16 	50W	55x55x85	4	11.5/13Kg
	GU10	GU10 	50W			

Material and features

Body made of aluminum alloy with smooth and seamless face;
Transparent tempered glass diffuser for 6111W; High boron, diffuser for 7193-5W;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP54;
Note: Matt silver on the top half and wood texture on the pole. It has high reflectivity with the reflector right above the lamp.

Specifications

This unit provides even light distribution and eliminates glare to an acceptable level to create visual continuity. They meet great favor among our customers for its exquisite design, unique profile, providing a pleasant light distribution suitable for villas, parks, squares and the garages and residential areas and etc.

Lawn Lamp Series

7195-1

5734				59.5x40x43		15/17Kg
5732				52x27x41		12.5/14Kg

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Transparent, tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP65.

Specifications

This unit provides even light distribution. They meet great favor among our customers for its exquisite design, unique profile, easy installation, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc.

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Transparent, tempered glass diffuser;
Anodized reflectors;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP65.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP65;
Note: convenient lamp installation and replacement, anti-glare and avoidance direct contact provided by the mesh mask set above.

Specifications

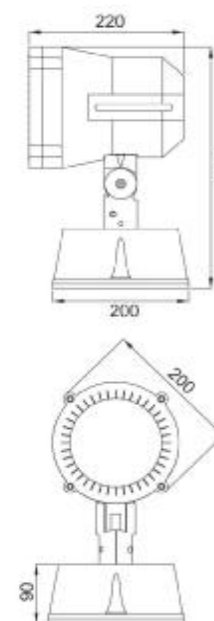

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Spot Lamp Series

9531

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
9531	G12		150/70W	39x27x21	1	4.7/5.1Kg

Material and features

Body made of die-casting aluminum with smooth and seamless face;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors for 9531;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP65;
Note: Its lamp and electrical appliances are designed all in one and accurate illuminating angel can be got according to the scale.

Specifications

Integration of lamp and electrical appliance makes these luminaries highly structured. Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Specifications

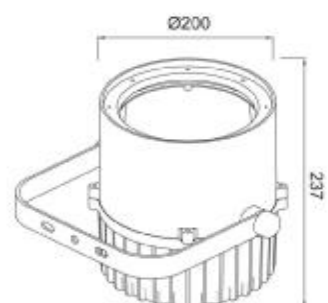

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

Schematic Diagram of In-ground Lamp

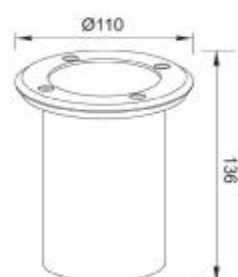

Precautions:

- ◆ To make sure all the glass are in place before tightening the screws.
- ◆ Avoid by all means a complete lock one after another while tightening screws. They should be tightened by steps in a cross-symmetrical way.
- ◆ While installing, avoid having dust go into the lamp to ensure waterproof, especially the rubber gasket position.
- ◆ Pay special attention to the size of the perforation (should be approximately the same as that of the light tube and smaller than the front cover).
- ◆ The depth of the perforation should be 10-20cm more than the lamp and to ensure impeded drainage, the additional part is to be buried with sand.

In-ground Lamp Series

Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6581

6581+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6581	E27		Max.26W	44x44x53	8	19/20.5Kg
6581+B		Par38 	80W	44x44x53	8	21/23Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Engineering plastic recessed box for 6581+B;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

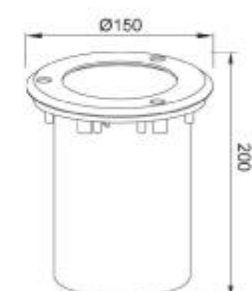

In-ground Lamp Series

6583

6583+B

Grid

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6583	E27		Max.13W	50x34x43	12	17/19.5Kg
6583+B				50x34x45	12	20/22.5Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Engineering plastic recessed box for 6583+B;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67;
Note: equipped with honeycomb inner grid for anti-glare.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6601+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6601+B	G5.3	MR16	50W	48.5x33x35	12	12/13.5Kg
	GU10	GU10	50W			

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Engineering plastic recessed box;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67;
Note: the beam angle can be adjustable.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6641+B		LED		47x38x23	40	12.5/14.5Kg
6642+B		LED		47x29x29	40	9/10.5Kg
6643+B		LED		32x26x21	40	5.5/6.5Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Engineering plastic recessed box;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67.

Specifications

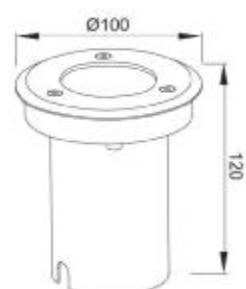

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

7621+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7621+B	G5.3	MR16	50W	55x22.5x27	20	11.5/13Kg
7622+B				55x22.5x27	20	12.3/13.8Kg

Material and features

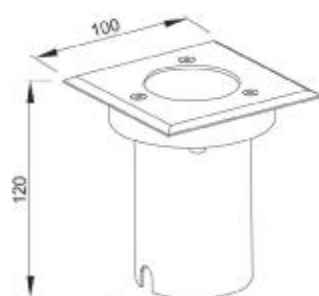

304 stainless steel lamp body and cover;
Transparent, tempered glass diffuser;
Engineering plastic recessed box;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP67;
Note:the rated voltage is 12V.

Specifications

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

7628+B				37x30x21	40	7/8.7Kg

Material and features

304 stainless steel lamp body and cover;
Transparent, tempered glass diffuser;
Engineering plastic recessed box;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP67.

Specifications

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6511

6511+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6511	E27		Max.9W	53x36x44	12	16.2/18Kg
6511+B			Max.50W	53x36x53	12	22/24Kg
		Par30 	75W			

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Engineering plastic recessed box for 6511+B;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67.

Specifications

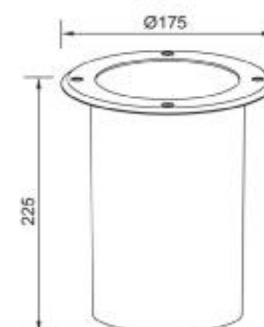

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6521

6521+B

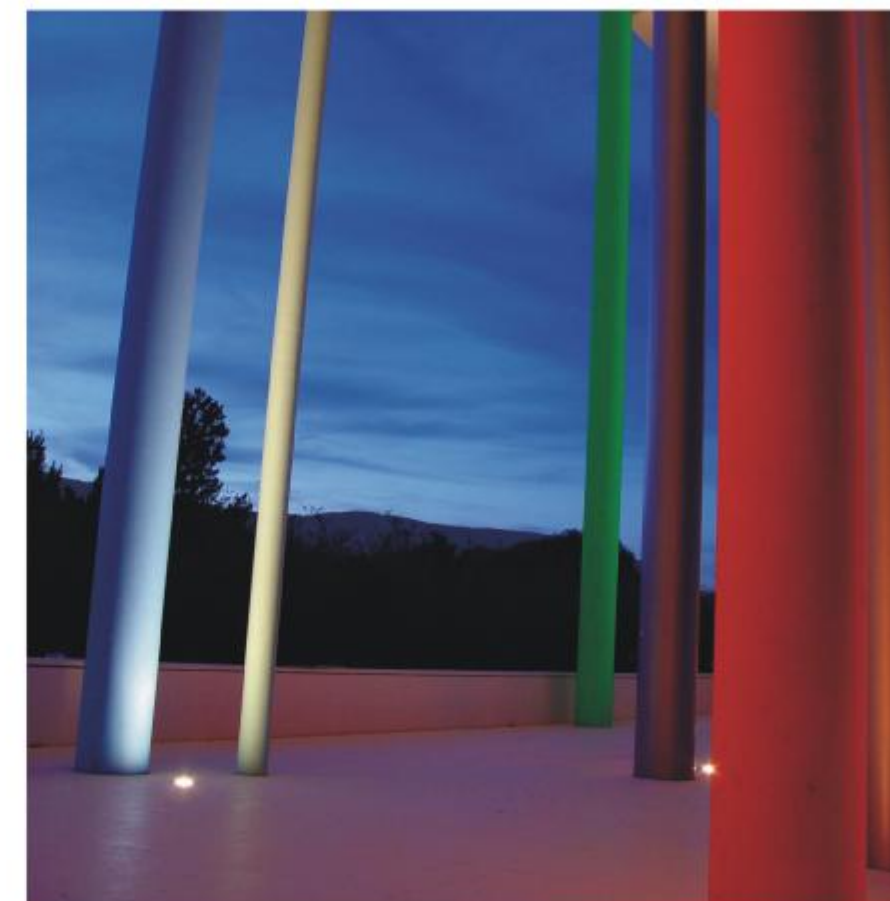

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6521	E27		Max.13W	56x36x53	12	17/19Kg
6521+B		Par38 	80W	58x39x60	12	23/25Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Engineering plastic recessed box for 6521+B;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6591+B

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6591+B	RX7S		150W	56x56x36.5	4	15/16.5Kg
	G12		150W			

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Anodized raffinal reflectors;
Engineering plastic recessed box for 6591+B;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP67;
Note: the beam angle can be adjustable with RX7S lamp holder.

Specifications

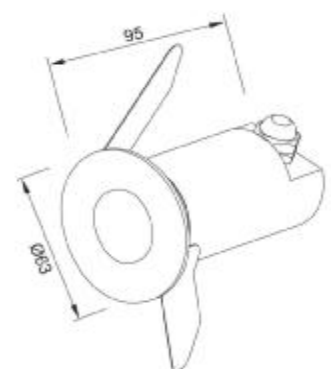

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

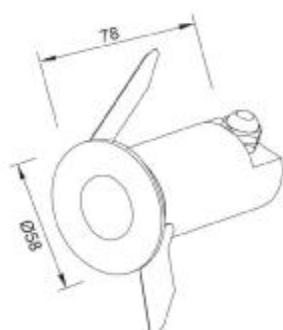

In-ground Lamp Series

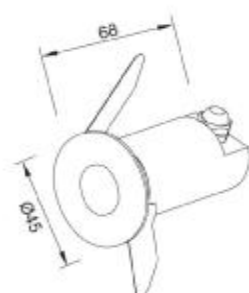

6701

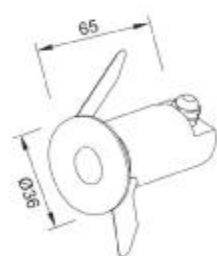

6702

6703

6704

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6701		LED		37x27x54.5	50	15/16.5Kg
6702		LED		34.5x21x43	40	8/9.2Kg
6703		LED		55x22.5x37	50	7/8.7Kg
6704		LED		22x14x39.5	50	5.5/6.8Kg

Material and features

Die-casting aluminum lamp body, and 304 stainless steel cover;
Transparent, tempered glass diffuser;
Waterproof and durable silicone rubber gasket;
Powder coating finish in electrostatic method;
Protection class: IP65;
Note: has been designed for use with ceiling lamp and in-ground lamp as well equipped with recessed box.

Specifications

Coated with outdoor powder in an electrostatic method, this unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

In-ground Lamp Series

6705

6706

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
6705		LED		32x26x21	40	9.5/10.5Kg
6706		LED		27x22x20	40	6.8/7.6Kg

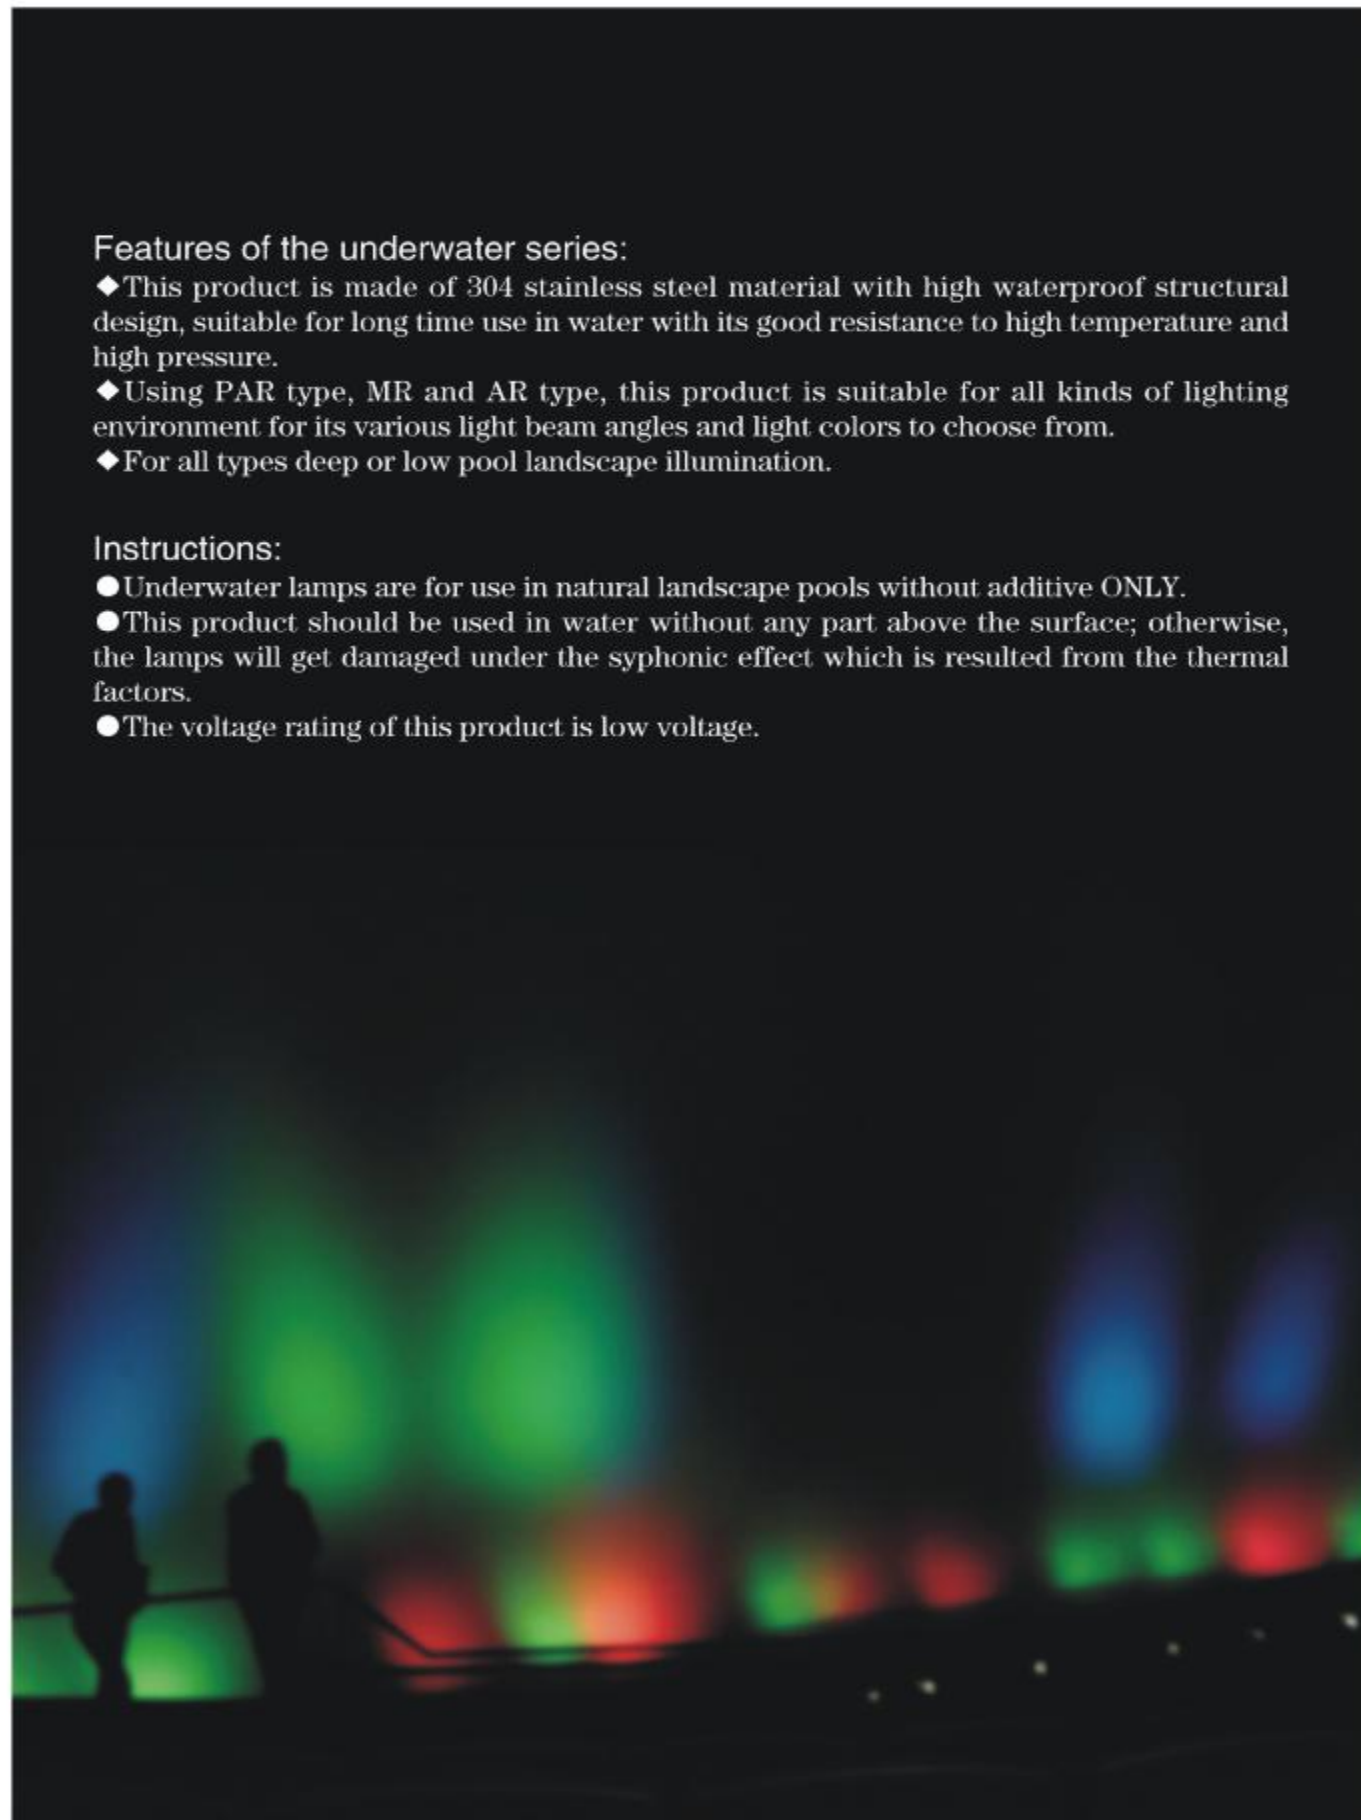

Material and features

Zinc alloy lamp body and cover;
Transparent, tempered glass diffuser;
Waterproof and durable silicone rubber gasket;
Nickel plating with anti-corrosion;
Protection class: IP64;
Note: these are used as ceiling lamps.

Specifications

This unit has excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution suitable for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile and easy installation.

Features of the underwater series:

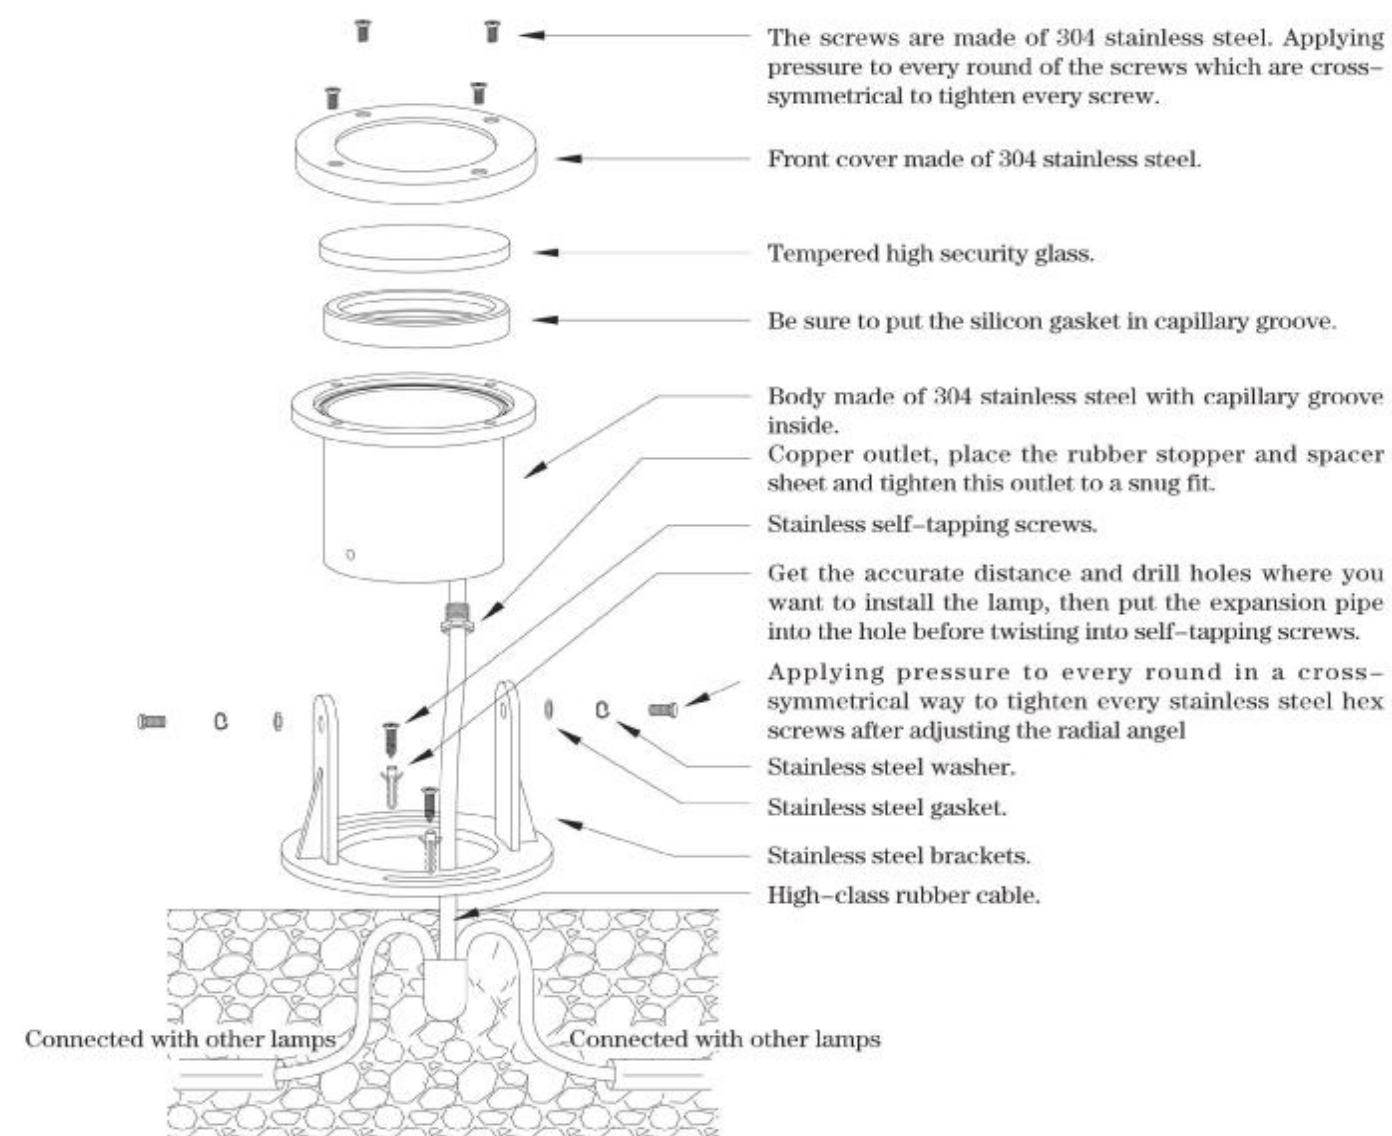

- ◆ This product is made of 304 stainless steel material with high waterproof structural design, suitable for long time use in water with its good resistance to high temperature and high pressure.
- ◆ Using PAR type, MR and AR type, this product is suitable for all kinds of lighting environment for its various light beam angles and light colors to choose from.
- ◆ For all types deep or low pool landscape illumination.

Instructions:

- Underwater lamps are for use in natural landscape pools without additive ONLY.
- This product should be used in water without any part above the surface; otherwise, the lamps will get damaged under the syphonic effect which is resulted from the thermal factors.
- The voltage rating of this product is low voltage.

Underwater Lamp Series

Schematic Diagram of Underwater Lamp

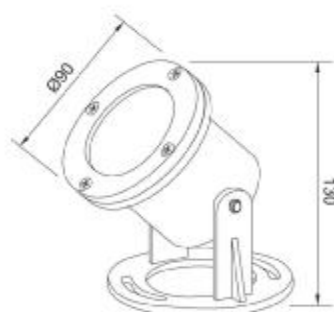

Precautions:

- ◆ Before installing, make sure an installation environment without any water left is in hand.
- ◆ Before the installation, it's necessary to ensure all joints of the light have got water-proof treatment and the joints of the wire are waterproof-ready.
- ◆ To avoid any accident, safety check of the light and its working environment is of vital importance in swimming pool after installation.
- ◆ Remember to adjust the light direction to ensure it's in the right place.
- ◆ To make sure the outer appliances are in the safe condition before water infusion.

Underwater Lamp Series

7651

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7651	G5.3	MR16	50W	55x22.5x27	20	16.5/ 17.5Kg

Material and features

304 stainless steel lamp body;
Transparent, tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

Specifications

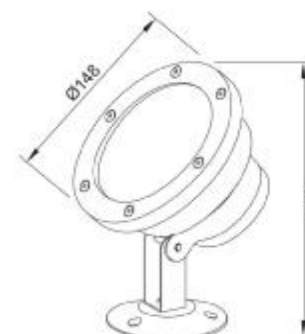

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

Underwater Lamp Series

7658

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7658	G53	AR111	50W	38x34x23	6	10.5/11.3Kg
	G53	Par36	50W			

Material and features

304 stainless steel lamp body;
Transparent, tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

Specifications

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

Underwater Lamp Series

7631

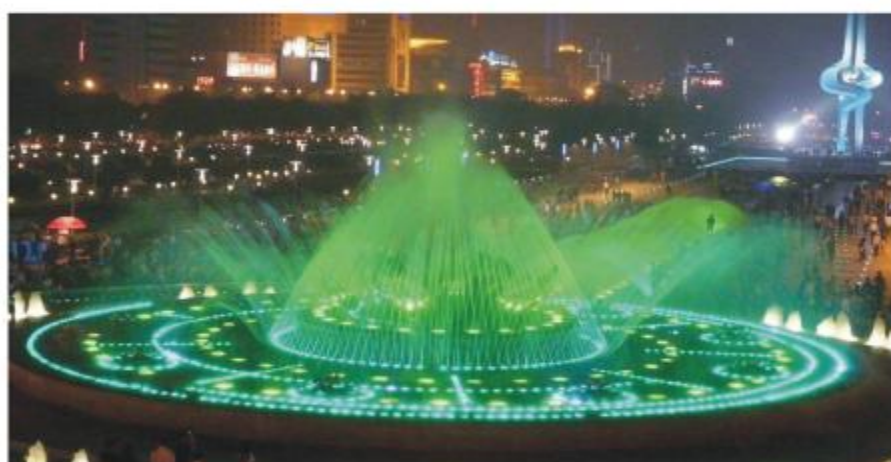

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7631	E27	Par38	80W	50x34x51	12	14.5/16.5Kg

Material and features

304 stainless steel lamp body;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

Specifications

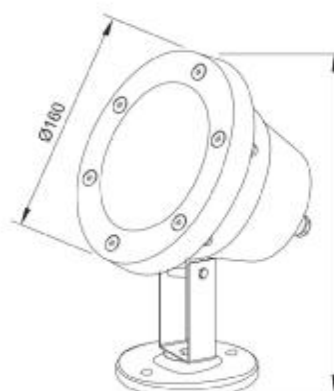

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

Underwater Lamp Series

7633

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7633	G53	AR111	50W	41x35x49	12	12.5/14.6Kg
	G53	Par36	50W			

Material and features

304 stainless steel lamp body;
Transparent, tempered glass diffuser;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

Specifications

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

Underwater Lamp Series

7601

7602

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7601	G5.3	MR16	50W	52x22x27	20	7.5/8.5Kg
7602	G5.3	MR16	50W	52x22x27	20	7.8/8.8Kg

Material and features

304 stainless steel lamp body;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

Specifications

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

Underwater Lamp Series

7603

Item No.	Holder	Lamp	Power	Measu.(cm)	Qty/Ctn	NW/GW
7603	G5.3	MR16	50W	55x22.5x37	20	7.8/9Kg

Material and features

304 stainless steel lamp body;
Fitting screws in 304 stainless steel;
Waterproof and durable silicone rubber gasket;
Protection class: IP68;
Note: rated voltage is 12V and be installed in water not more than 1M is suggested.

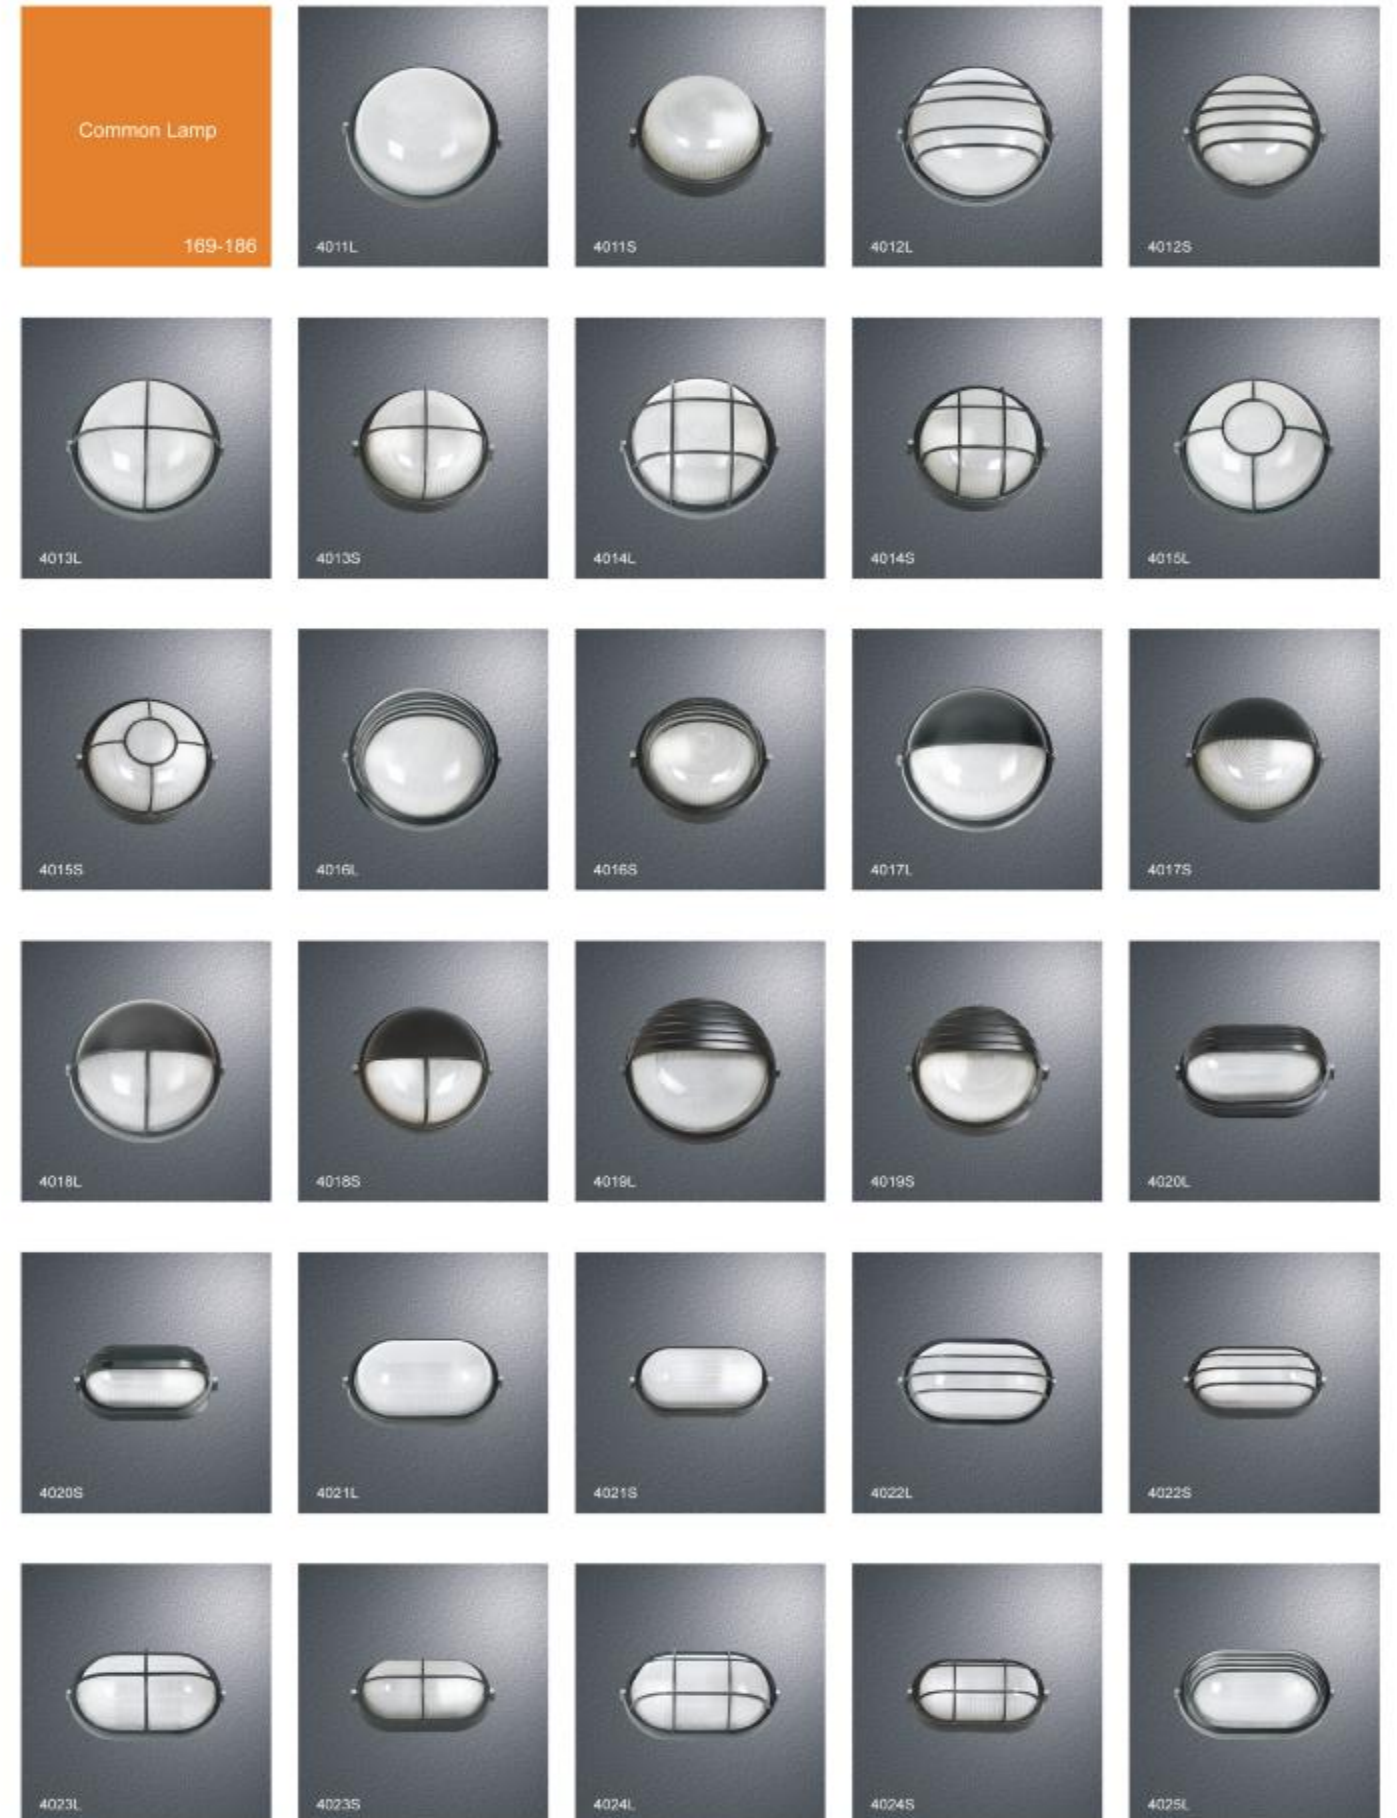

Specifications

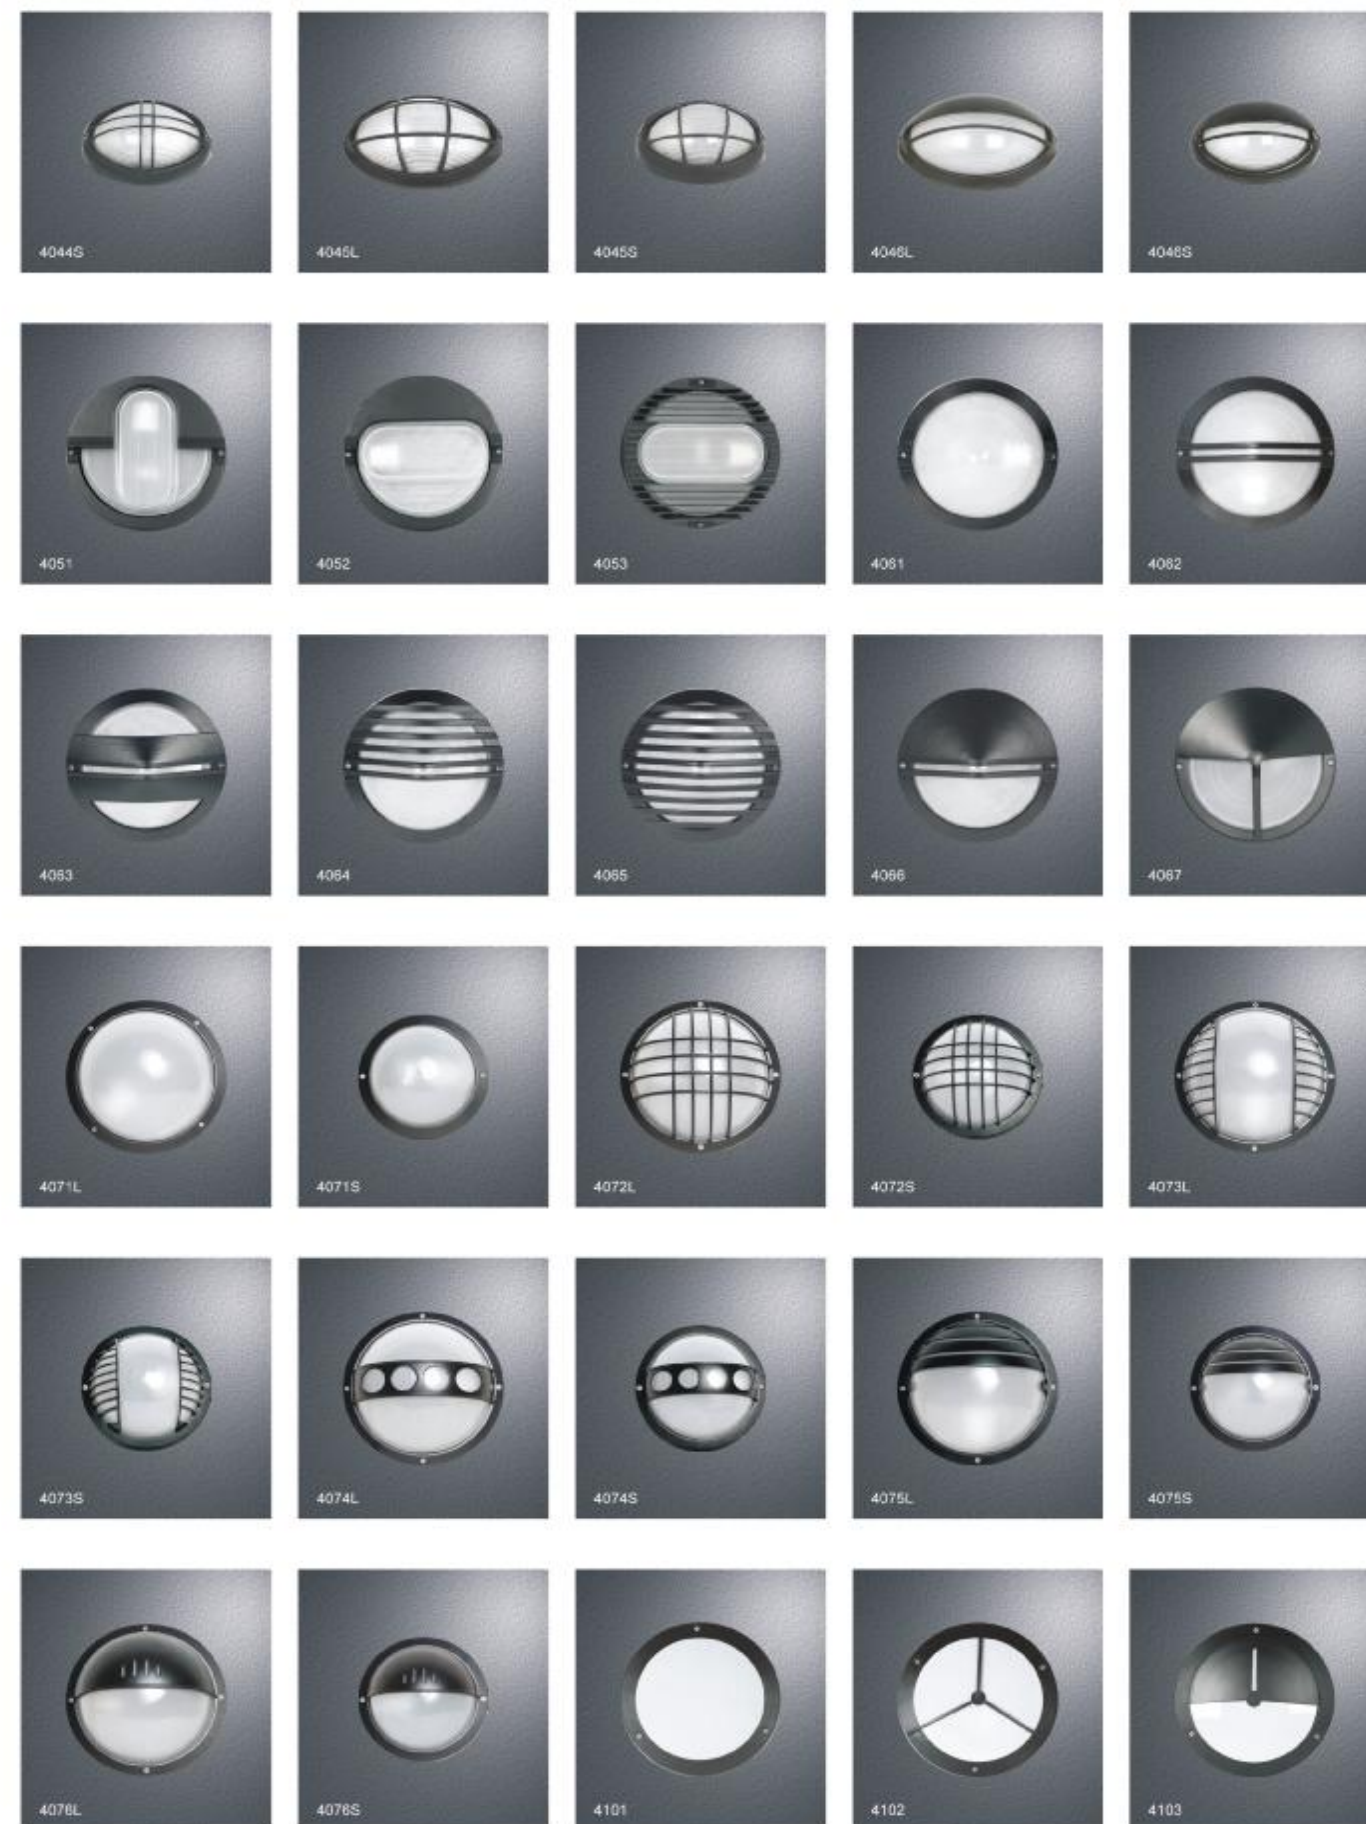

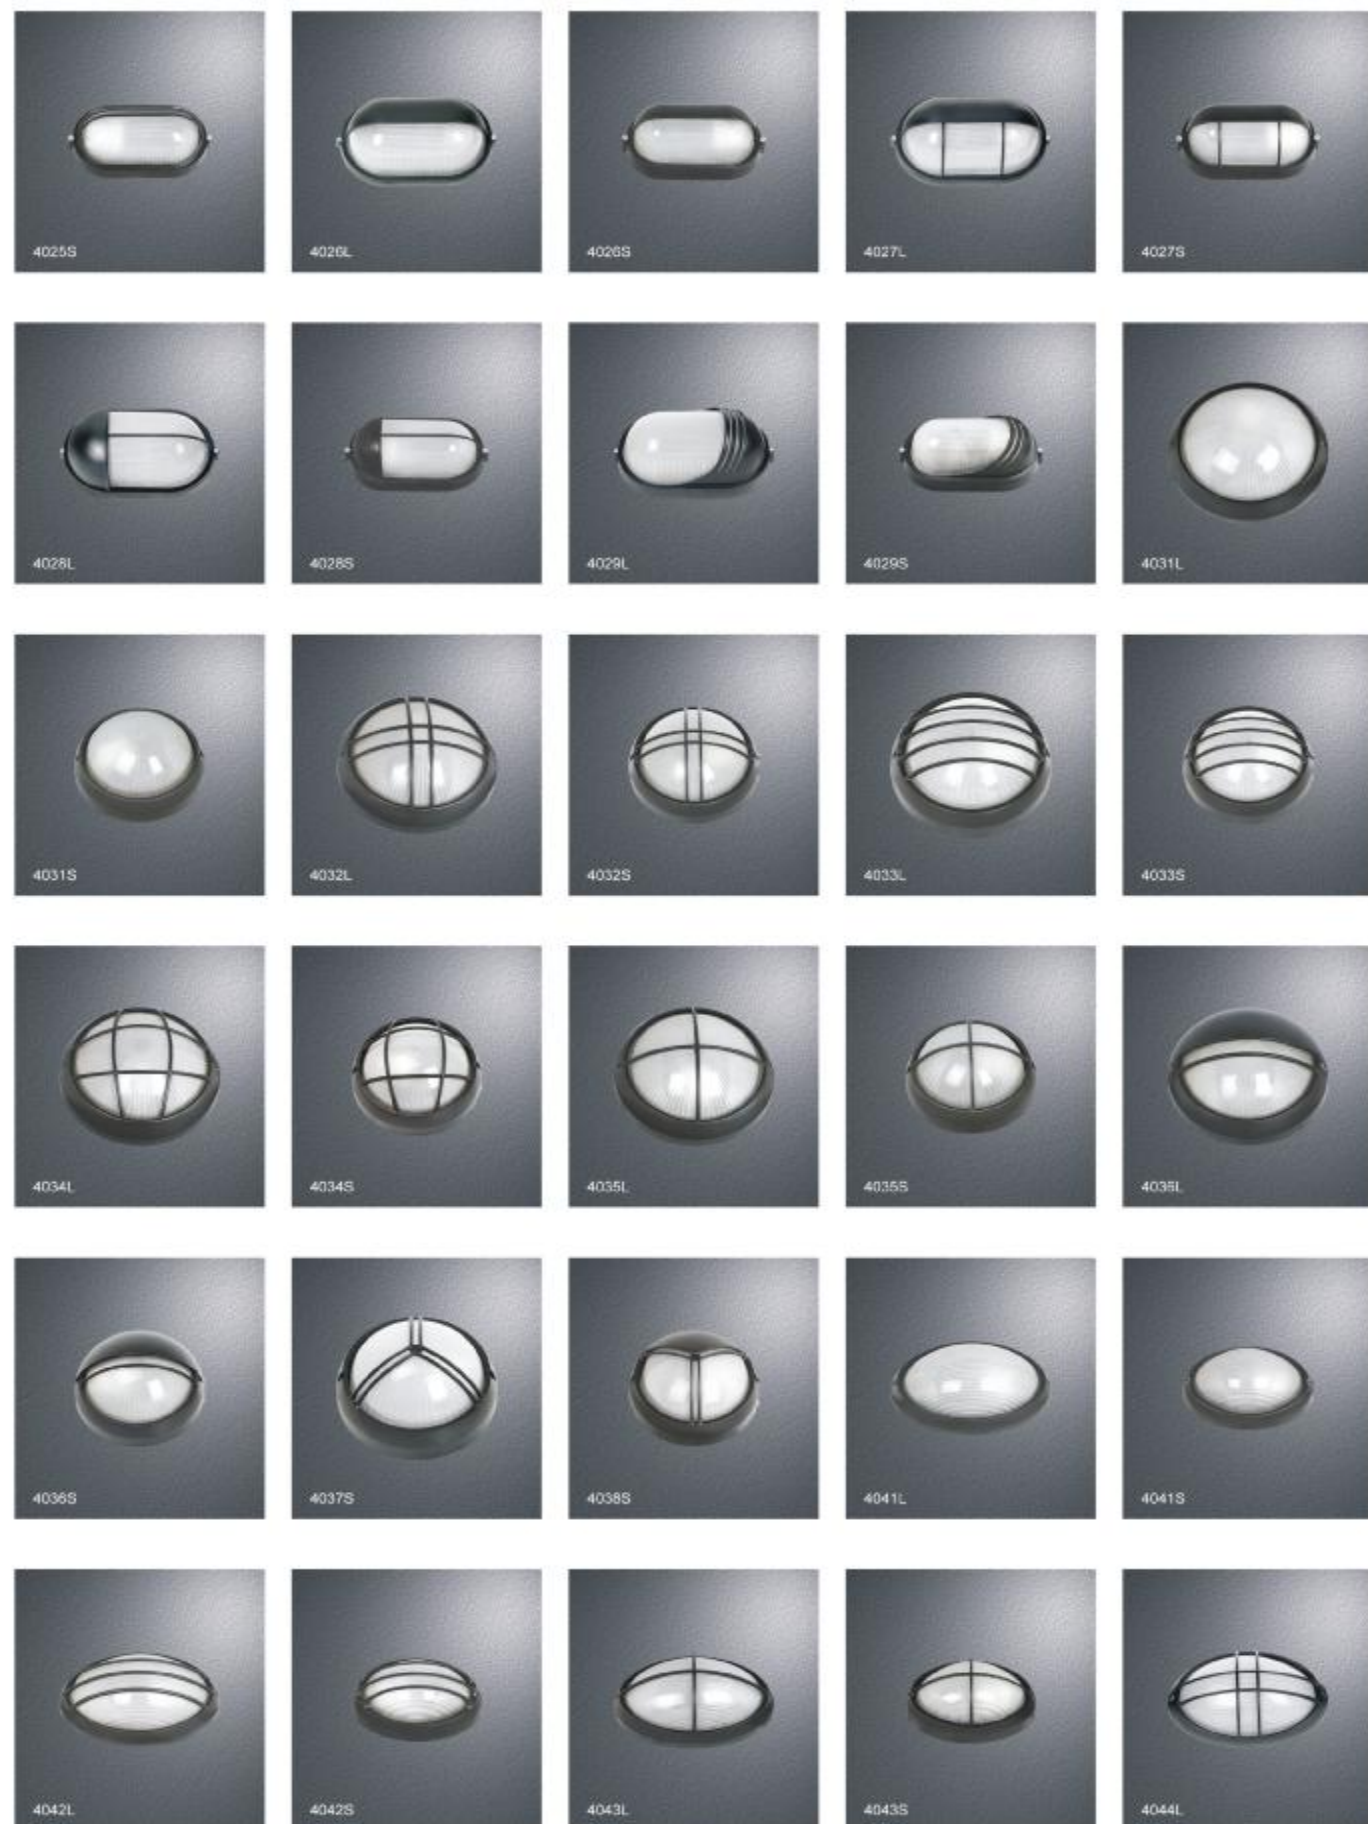

304 stainless steel with excellent anti-corrosion, ageing-resistance features, these luminaries provide even light distribution which enables designers to create visual continuity and the best light effects, providing a pleasant light distribution, used under water for villas, parks, squares and residential areas and etc. They meet great favor among our customers for its simple design, novel and attractive profile.

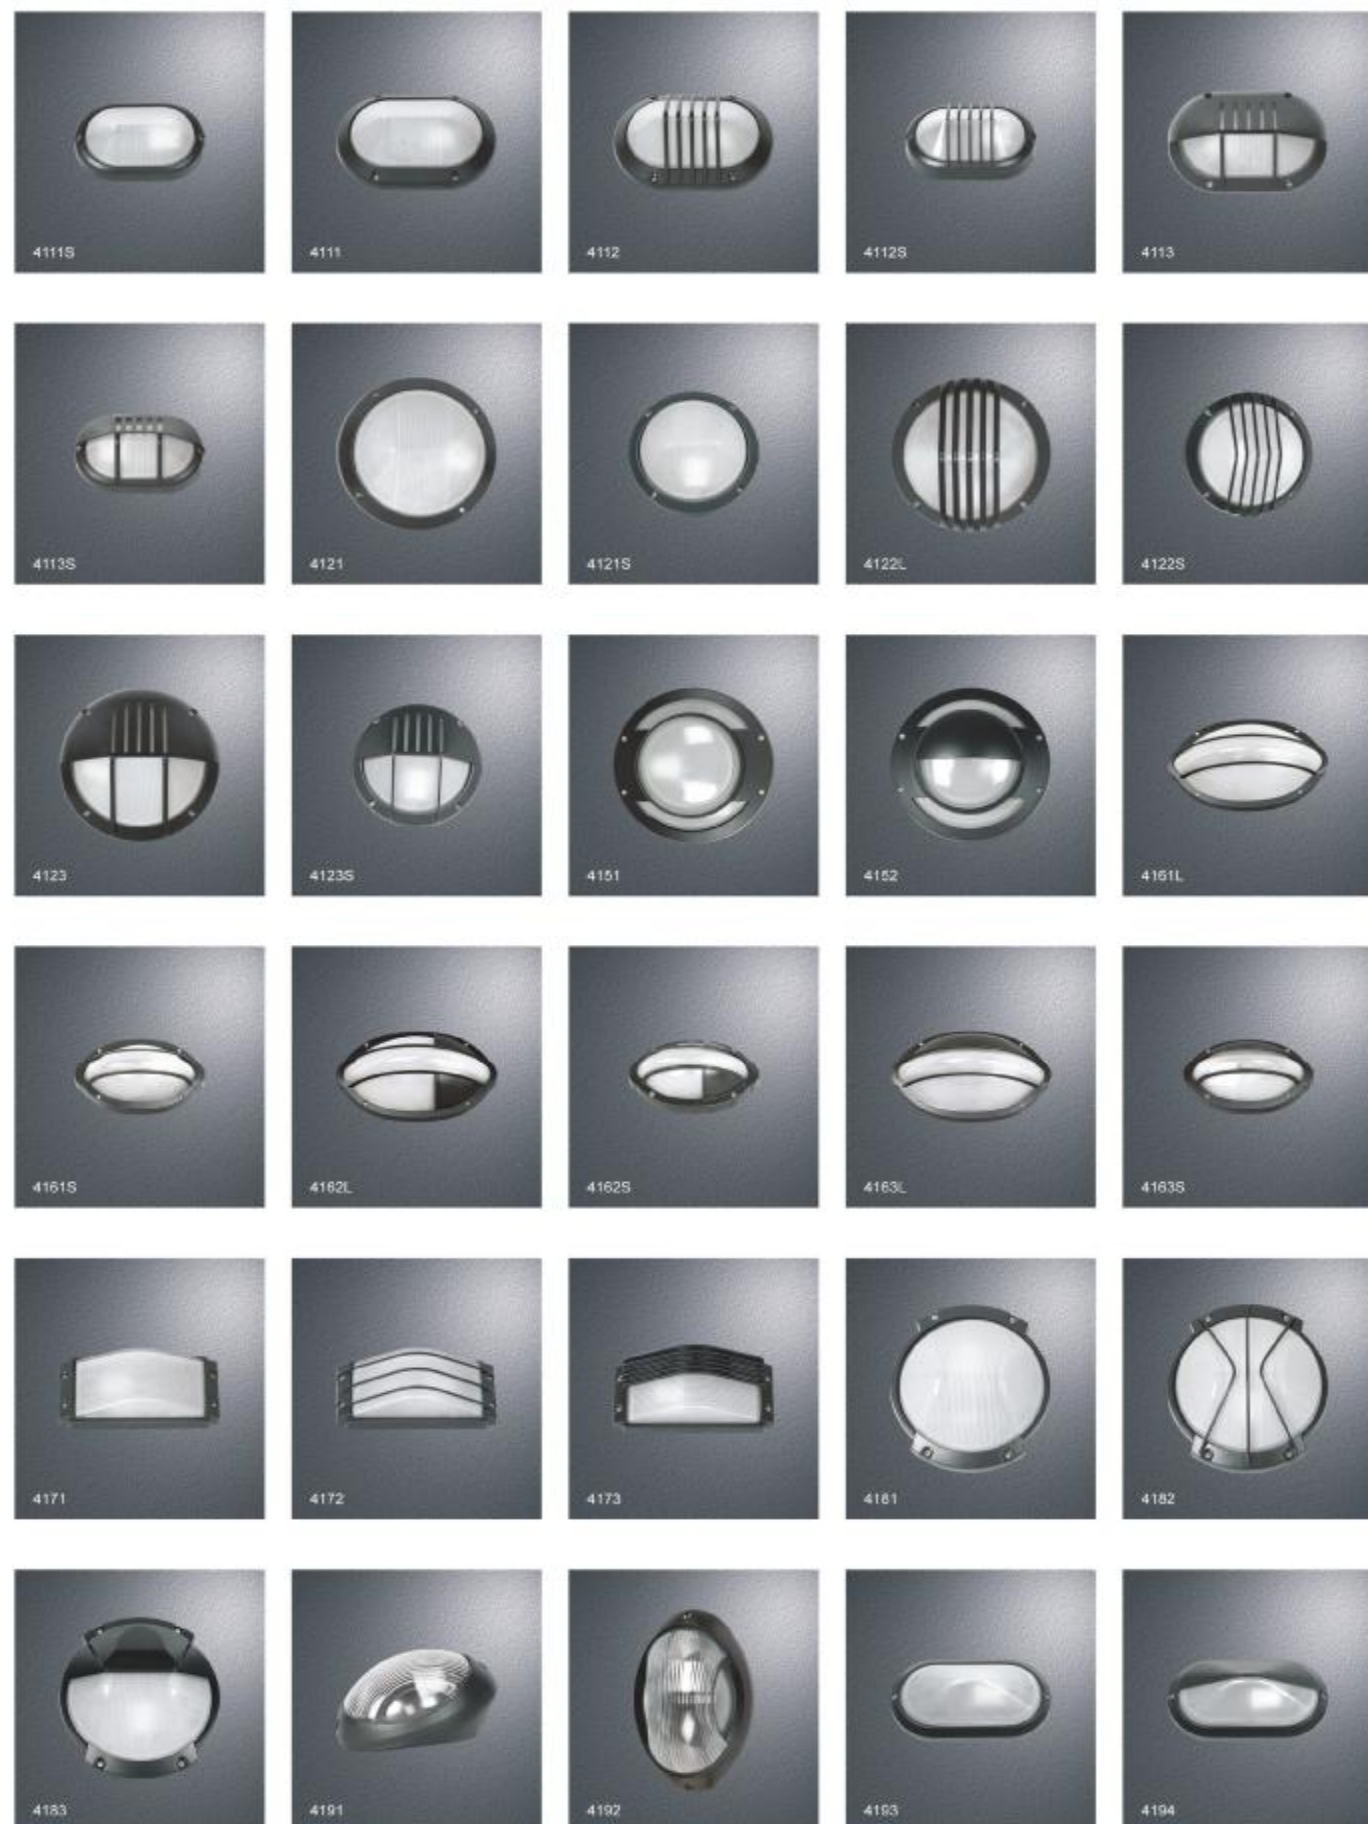

Common Lamp

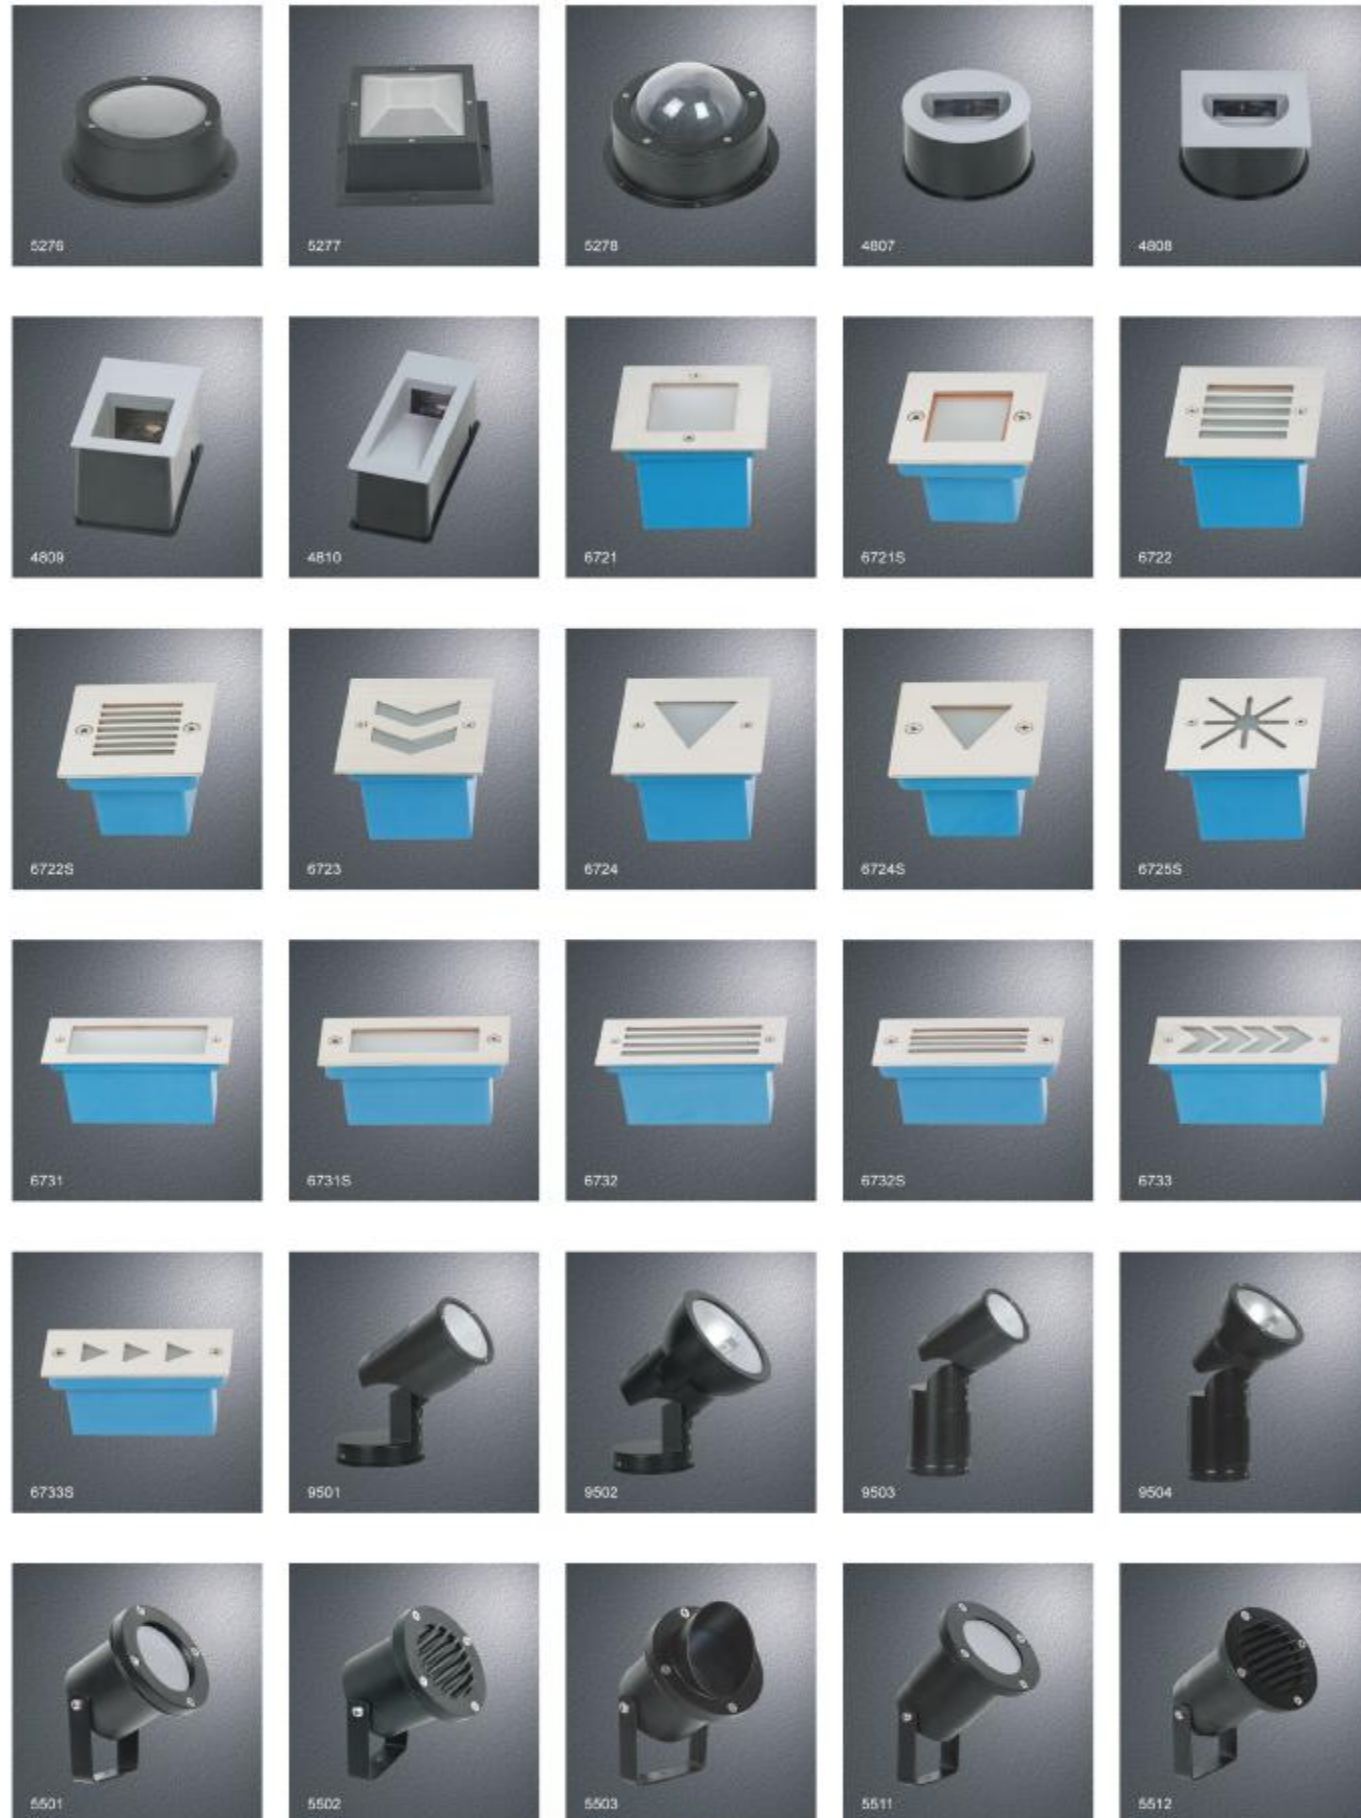

When we refer to "common lamp", we mean those that appear most frequently trade in the market, including wall lamp, moisture-proof light, recessed lamp, lawn lamp, spot lights, underground and underwater lamp, garden lamp etc. These products can always satisfy the demand either of landscape lighting outdoor project lighting for its wide variety and they also enormously enrich the customers' selective on the lamps.

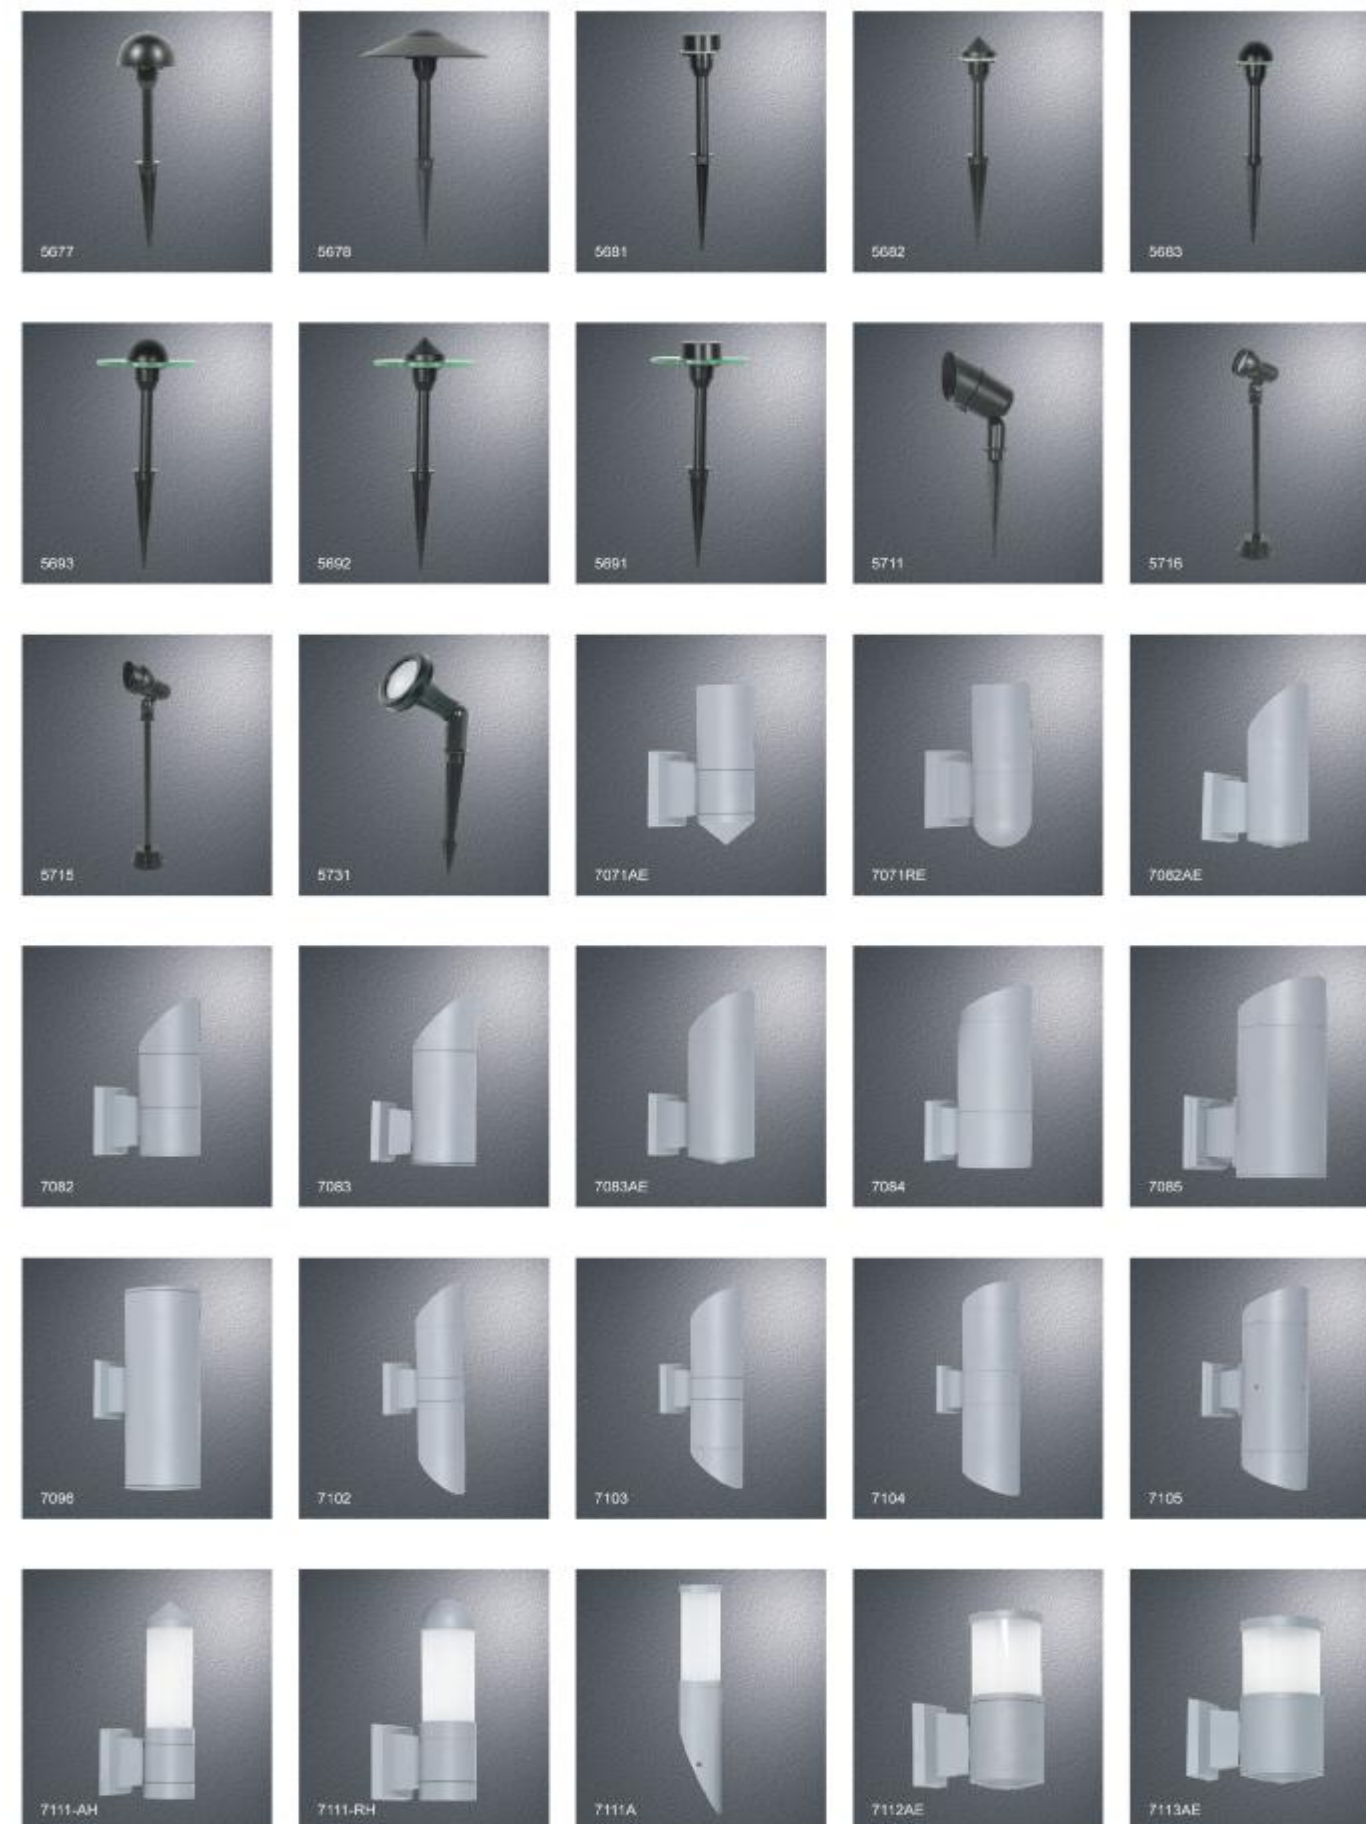

Specifications

I. 304 stainless steel components and screws have the following advantages:

- high anti-corrosion;
- good bending and compression properties;
- good wear-resisting properties and attractive textures;
- stable physical characteristics between -196°C and 800 °C;
- natural attractive appearance;
- No rusting in the normal outdoor condition;

304 stainless steel

II. Oxidized and plated aluminum reflectors

- elegantly fitted and reasonably designed, the reflectors can meet the requirement of providing even and pleasant light distribution and reducing light loss, scattering or glaring;
- Good light reflection effects are ensured owing to their high anti-corrosion;
- Kinds to choose from including smoothes, sandblasting, honeycombs, dermatoglyph /electrical erosion lines and dots, stripes;

Smoothes Sandblasting Honeycombs Dermatoglyph Lines and dots Stripes

Tempered glass

III. 3-10mm tempered glass

- Up to 5-10 times good resistance to impact and 3-5 times bending strength as the ordinary glass;
- Because of the even internal stress, map cracking will appear after destructive force;
- Excellent acid and alkali resistance performance;
- 2-3 times sharp quenching and thermal shock resistance as the ordinary glass makes it possible to endure the temperature change within 150 °C and avoid cracks;

IV. The exposed rubber cable is in accord with the European requirements and also possesses the following features:

- High-temperature resistance;
- Good physical properties are promised however harsh condition it is in;
- Anti-aging and corrosion-proof outdoors;

V. Adhesive glues are the newly-developed high-tech military products with the following features:

- high solidification speed;
- Incomparable bonding performance, which makes the bonding strength among aluminums 120kg/m;
- Non-toxic and with no irritation makes it environmental protection;
- Anti-corrosion from water, acid, alkali, oil ,etc;
- Anti-aging;
- Electrical insulation;
- good heat resistance(between -50 °C and 180 °C);

Pattern by CNC cutting machines

VI. CNC cutting machines

Materials like aluminum or stainless steel can be cut into different shapes with various patterns and faceplate of underground or underwater lamps can be got directly from 304 stainless steel plate with CNC cutting machines at hand; and any curve patterns is accessible with this precision cutting technology.

VII. Large size milling machines , and CNC lathes

Machines and lathes of this type are used to process holes that are with high-precision in their mutual position to ensure the unified standard of each pitch. They are also used to process cylinder, the cone, deburring, circular arcs and curves. More importantly, all the products are in the same size and with smooth grains. In addition, the machine and lathe can find their use in peeling and cutting parts whether they are axial or dish-shaped as well as in grooving, drilling, reaming and boring.

VIII. UV-stop and ageing-resistant special outdoor powders

Coated with our outdoor power in an electrostatic method, your products turn aesthetic in appearance and won't fade or depaint because of the strong adhesion of the power. Furthermore, the colors are optional.

We promise to ensure the interests of our client because we can avoid the defective products maximally by supervising each step of the procession, from the raw material we import, the course of manufacturing and the inspection of the finished products etc.
